

Free, At Last

- Feeling used and abused by monopolistic software vendors?
- Weary of tedious and arrogant *sales people* who announce licensing costs to you?
- Confused by impractical, academic UNIX folks?

Perhaps it's time for Open Systems Transition from Schunk-IT Consulting!

OST can help you manage the inflexibility and high costs associated with desktop and server software, and provide top-notch service and support. Schunk-IT Consulting provides the buffer you need to help you be successful with Open Systems.

- Reduce your server and desktop software costs.
- Simplify computing solutions for your customers.
- Consolidate and standardize support.

The path to open systems lies in application standardization, hardware standardization and operating system standardization — ***in that order.***

Schunk-IT Consulting provides distribution, training and support for Open Office 1.0, IBM computing platforms and Linux. We've chosen stable products and releases, inexpensive and suitable for commercial and government environments.

Schunk-IT Consulting takes responsibility for compliance with the GNU and Lesser GNU license requirements to share fixes and upgrades, shielding you from disruption and unnecessary cost.

Schunk-IT Consulting:

- Works with you to determine if Open Systems is right for your organization, in whole or in part.
- Provides training, pilot programs and deployment of Open Systems solutions suitable to *your* environment.
- Provides a single source for ongoing support.
- Plans, stages and deploys required or desirable maintenance and upgrades to new versions of Open Systems software.
- Moves your organization to a standard, application-driven IT infrastructure.

Call Schunk-IT Consulting *today* to learn how Open Systems can help you!
